*PVC finishing profiles*

Our company, Lemal Spółka z o.o., was established in 1988 in Bydgoszcz.

Lemal Spółka z o.o. was established in 1988 in Bydgoszcz. From the very beginning our most important goal has been to ensure superior quality of our products. Many years in business let us gain wide experience in production of PVC goods. During all these years of operation we have been developing the company to improve satisfaction of our customers. We have been pioneers in many areas and we have particularly focused on interior finishing culture. The rich palette of available colours of our skirting boards, angle trims, quarter rounds, door casings and other products are our main source of pride. Our wide offer also includes top-quality building profiles such as mould strips for dimpled membrane, drip beads, corner beads with mesh and much more.

We manufacture extruded profiles made of additive-rich blends of rigid and soft PVC.

Lemal's business is manufacture of extruded profiles made of additive-rich blends of rigid and soft PVC as well as other plastics. We also manufacture plastic parts by extrusion and provide rotary and conventional pad printing. As far as extrusion is concerned, we are able to perforate or knurl selected surfaces. Regardless of the intended use of these profiles, we prepare tailor-made solutions for our customers, from start to finish.

In addition to profiles for thermal insulation systems and for office and residential interior finishing, our offer includes specialist technical profiles that are manufactured to individual customer requirements. Our in-house Planning and Development Department and our professional tool shop allow us to address customers' needs in a flexible and individualised manner. Many years of experience in construction of tools ensure high quality and customer satisfaction. This is how we create customised, specialist products that often have complex cross-sections and are designed for special applications.

Upon request of our customers, we may provide special picking, packing and labelling for our profiles. In continuous cooperation arrangements, our freight forwarders will take care of timely delivery of the products to your warehouses.

In order to meet various needs of our customers in all respects, we produce our profiles using top-quality materials sourced from renowned European manufacturers.

### Skirting boards

Two-part skirting board with flexible rubber pads to conceal irregularities of walls and floors. Suitable for masking and separation of cables. A removable upper part of the board is a perfect solution for renovation, painting, plastering or wallpapering. Removal of the whole skirting is not required. Finishing components such as corner pieces, connectors and blanking pieces also allow for cable routing.

Pages 6-7

### Angle trims

Used as protection against damage and as final aesthetic trims for corners during painting works, installation of PVC, HDF and MDF panelling, siding, soffit, window sills, etc. Applied in high-humidity spaces. The trims mask finishing work imperfections.

These products are used to conceal corner irregularities.

Pages 8-14

### Quarter rounds

Used as protection against damage and as final aesthetic trims for corners during painting works, installation of PVC, HDF and MDF panelling, siding, soffit, window sills, etc. Applied in high-humidity spaces. Resistant to exposure to adverse weather. The rounds mask finishing work imperfections.

These products are used to conceal corner irregularities.

Pages 15-17

## Door casings

Highly durable, abrasion- and impact-resistant, not susceptible to deformation from water or high temperature exposure. Used as protection against damage and as final aesthetic trims around door leaves. Applied in high-humidity spaces as well. Resistant to exposure to adverse weather. Used to correct finishing work imperfections

Pages 18-20

## Profiles for investment projects

Trims for the finishing of investment project works and construction works. Our offer includes carpet trims, wallpaper trims, protective profiles, sheet flooring profiles, profiles for stairs, sheet flooring trims, etc.

Pages 21-25

## Building profiles

Top-quality building profiles. Their varied range may help complete even the most complex construction works.

Pages 26-34

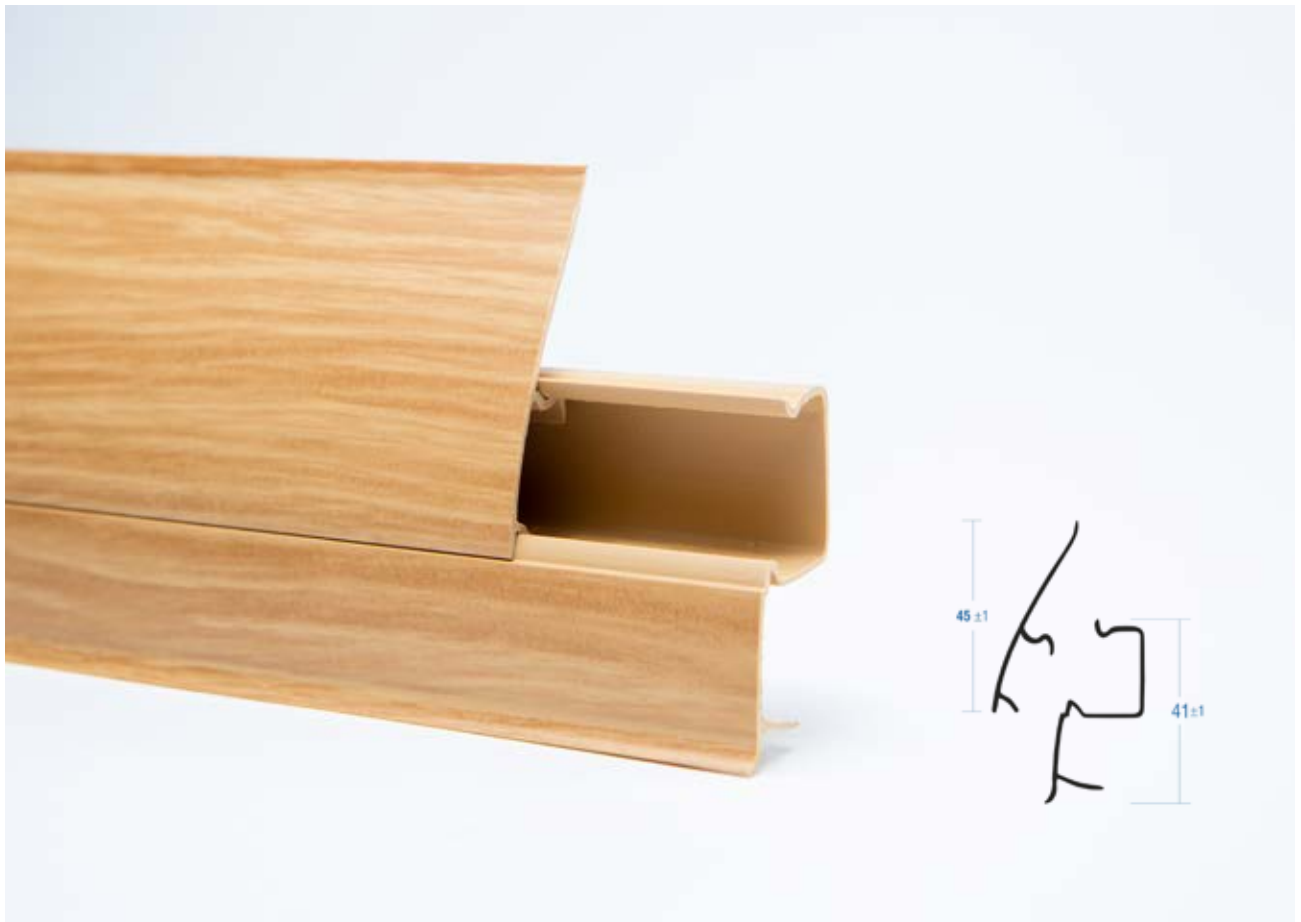

## Skirting board 25009

Length: **2.5 m**  
Packaging: **28 pieces (70 m)**  
Colour palette: **31 colours**

Two-part PVC board suitable for containing cables, with flexible rubber pads to conceal irregularities of walls and floors. The design of finishing components is adapted for cable routing.

## Colour palette

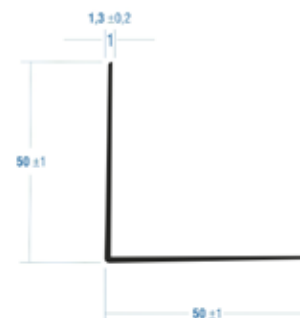

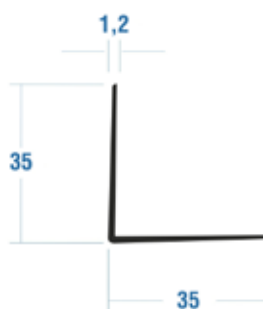

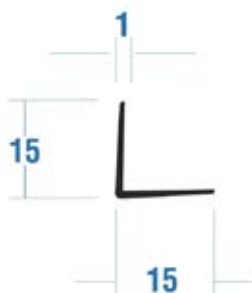

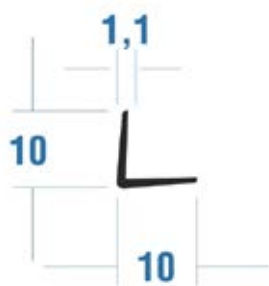

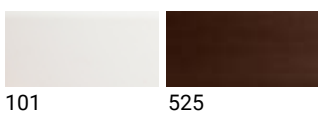

Angle trim 5x17, 10x10, 15x15  
35x35, 50x50

Length: 2.7 m, white – 3 m  
Packaging: 25 pieces (67.5 m, white – 75 m)  
Colour palette: 2 colours

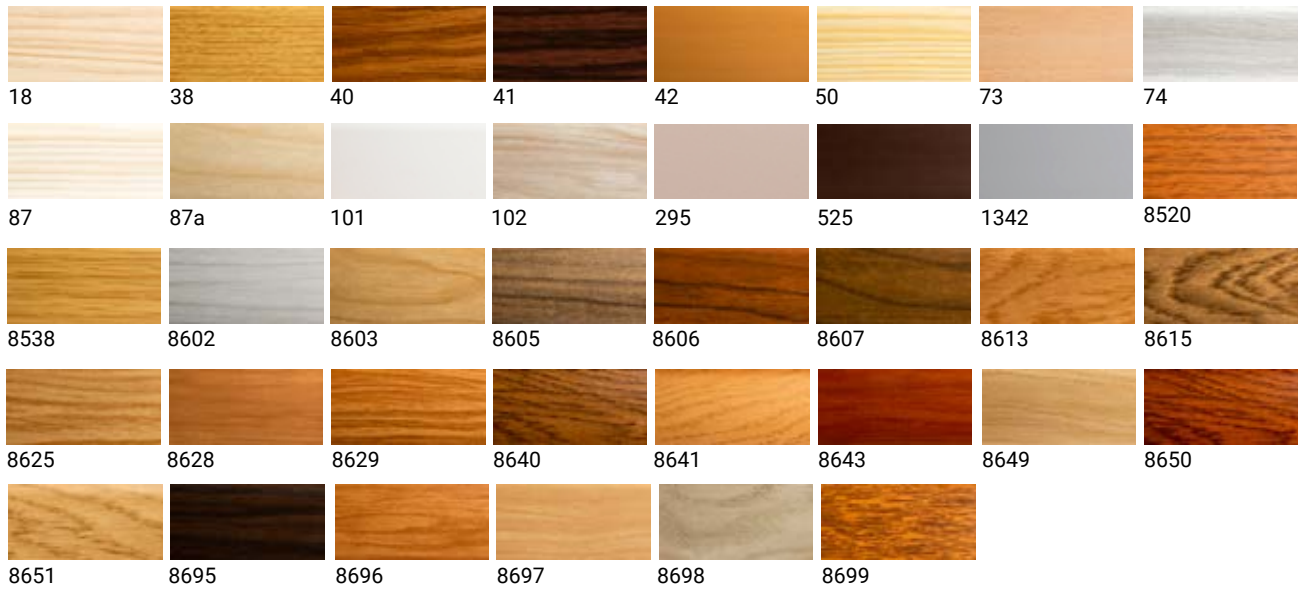

## Angle trim 10x20

Length: **2.7 m, white – 3 m**  
 Packaging: **25 pieces (67.5 m, white – 75 m)**  
 Colour palette: **38 colours**

## Angle trim 20x20

Length: 2.7 m, white – 3 m

Packaging: 25 pieces (67.5 m, white – 75 m)

Colour palette: 46 colours

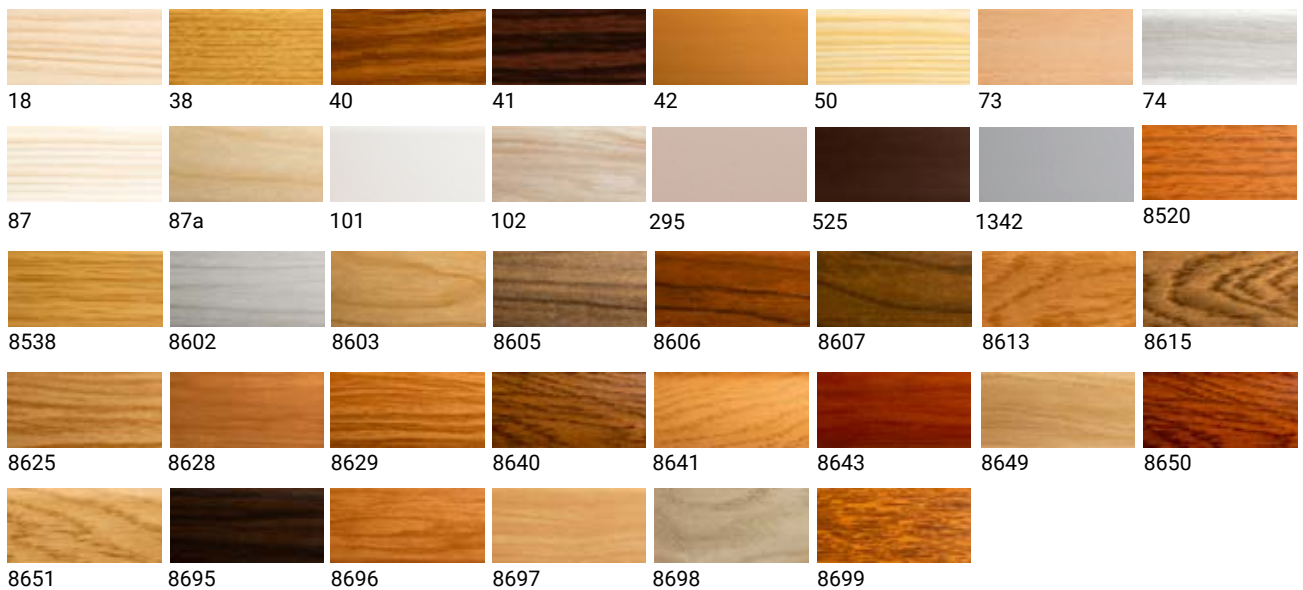

## Angle trim 25x25

Length: **2.7 m, white – 3 m**

Packaging: **25 pieces (67.5 m, white – 75 m)**

Colour palette: **38 colours**

## Angle trim 30x30

Length: **2.7 m, white – 3 m**

Packaging: **25 pieces (67.5 m, white – 75 m)**

Colour palette: **46 colours**

## Angle trim 40x40

Length: 2.7 m, white – 3 m

Packaging: 25 pieces (67.5 m, white – 75 m)

Colour palette: 46 colours

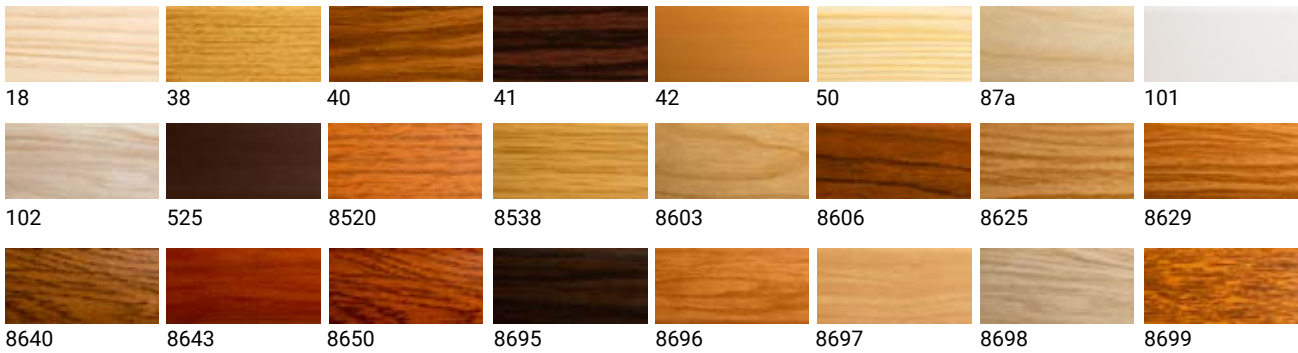

## Universal U angle trim 25x25

Length: **2.7 m, white – 3 m**

Packaging: **20 pieces (54 m, white – 60 m)**

Colour palette: **24 colours**

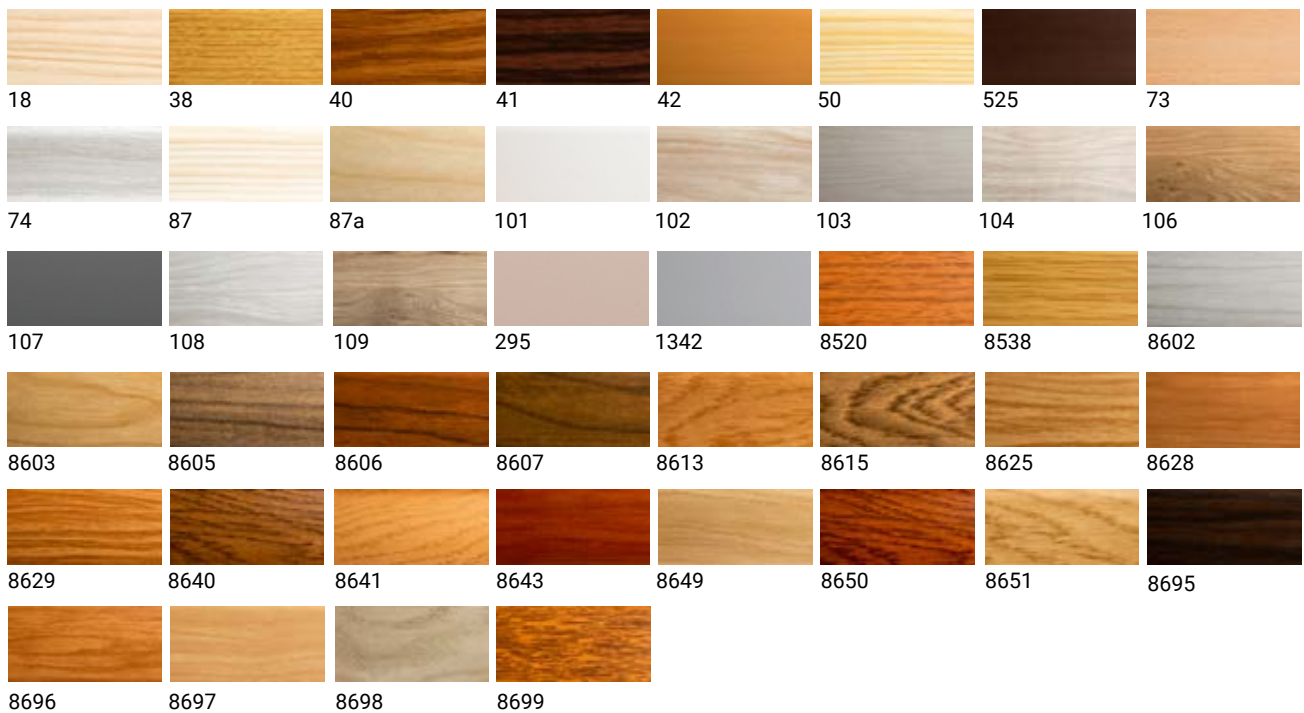

## Concave quarter round 20x20

Length: **2.7 m, white – 3 m**

Packaging: **20 pieces (54 m, white – 60 m)**

Colour palette: **44 colours**

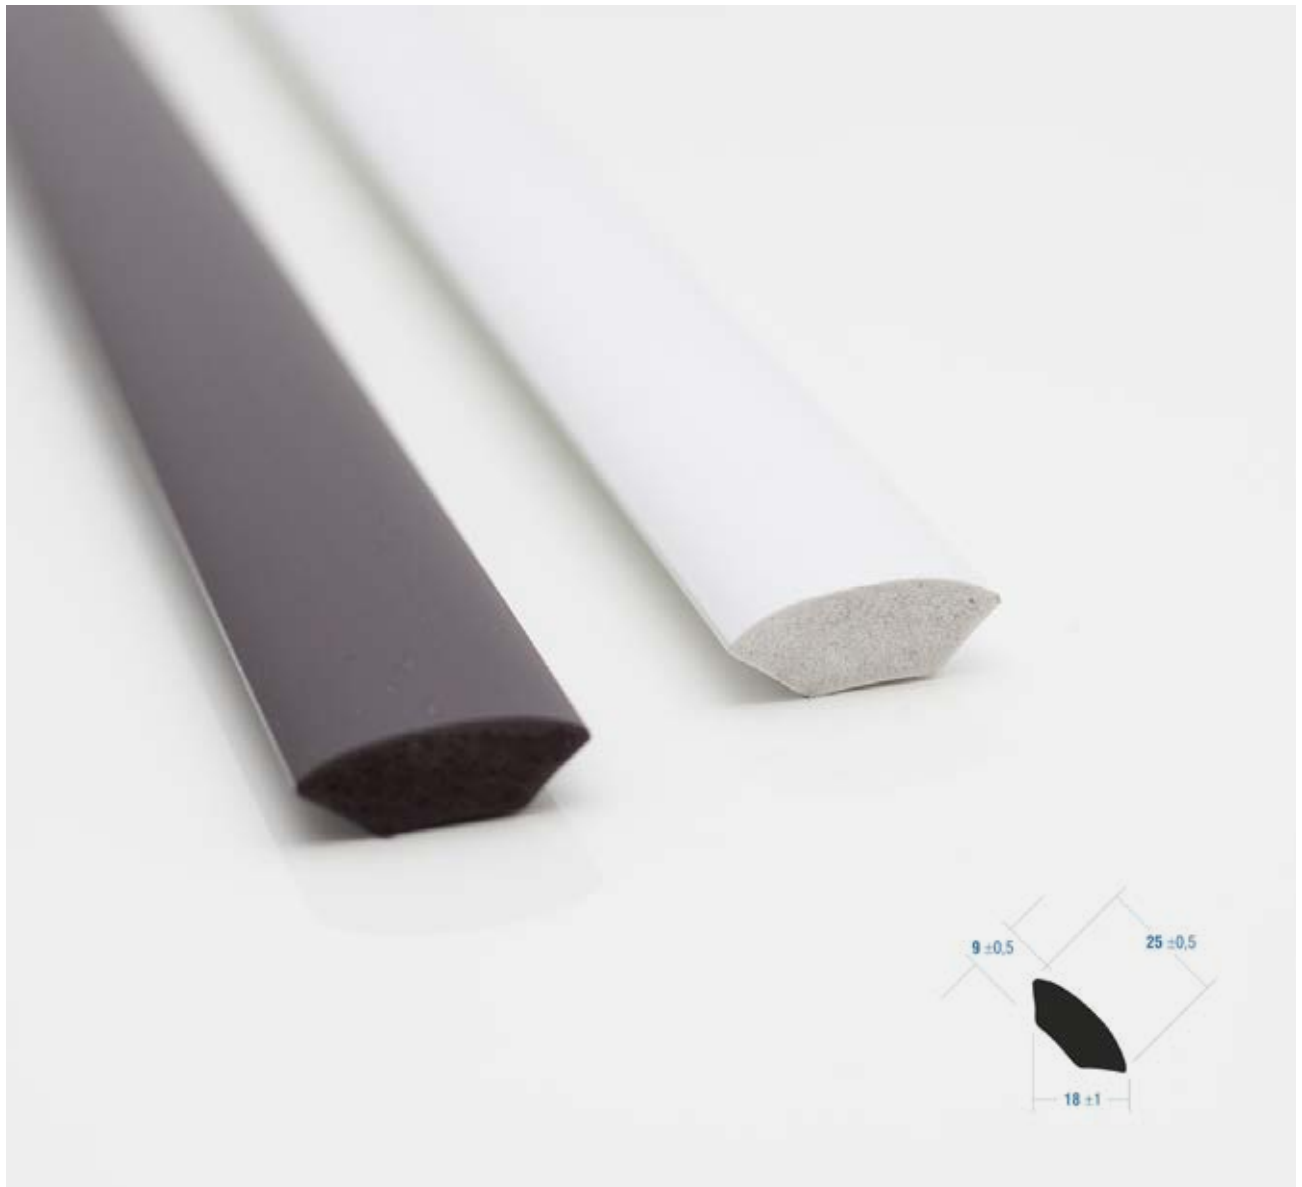

## Convex quarter round 14x14

Length: 2.5 m, white – 3 m

Packaging: 20 pieces (50 m, white – 60 m)

Colour palette: 44 colours

## Convex quarter round 18x18

Length: **2.5 m, white – 3 m**

Packaging: **20 pieces (50 m, white – 60 m)**

Colour palette: **3 colours**

## Sheet flooring profiles 30105

This sheet flooring trim allows you to give your floor an aesthetic and practical finish.

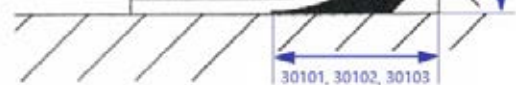

Length: **3 m**  
 Packaging: **20 pieces (60 m)**  
 Colour palette: **6 colours**

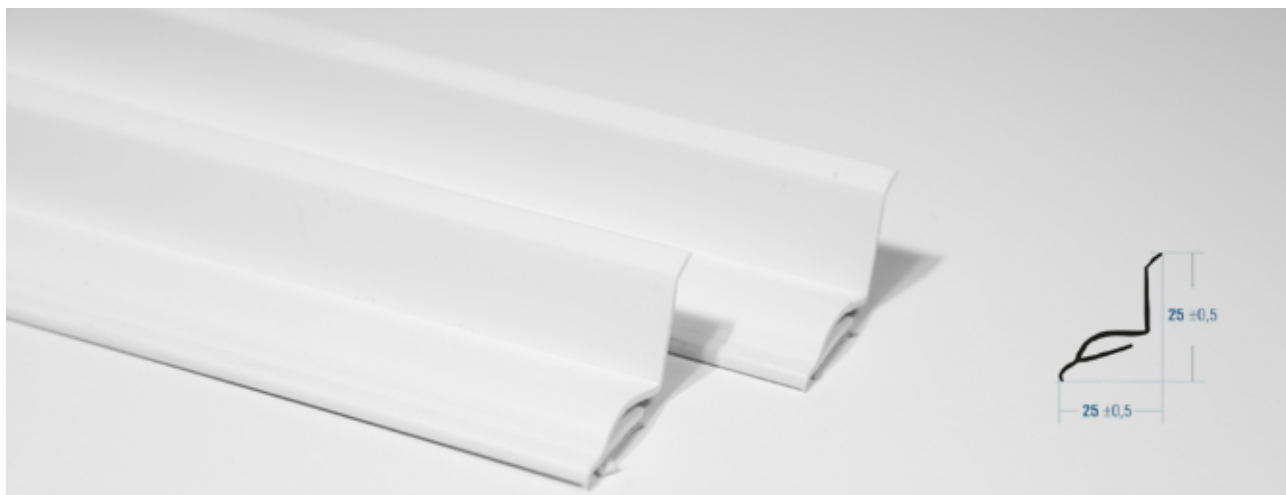

## Sheet flooring profiles 30101, 30102, 30103

Various types of rubber camber trims facilitating sheet flooring installation.

Length: **3 m**  
 Packaging: **30 pieces (90 m)**  
 111

## Bathtub trim 18008

Length: **2x1.8 m set**  
Packaging: **10 sets (36 m)**  
Colour palette: **white**

Conceals unaesthetic gaps between edges of bathtubs, sinks and shower bases and walls with ceramic tiles. Prevents mould growth. Complete with corner and end pieces. Also available with PE tape for installation.

## Wallpaper trim 26025

Length: **2.6 m**  
Packaging: **15 pieces (39 m)**  
Colour palette: **white**

Improves the appearance of outer edge finish, protects wallpapers from damage and abrasion.

## PVC straight corner bead PT2

Length: **2.5 m and 3 m**  
Packaging: **50 pieces (125 m, 150 m)**

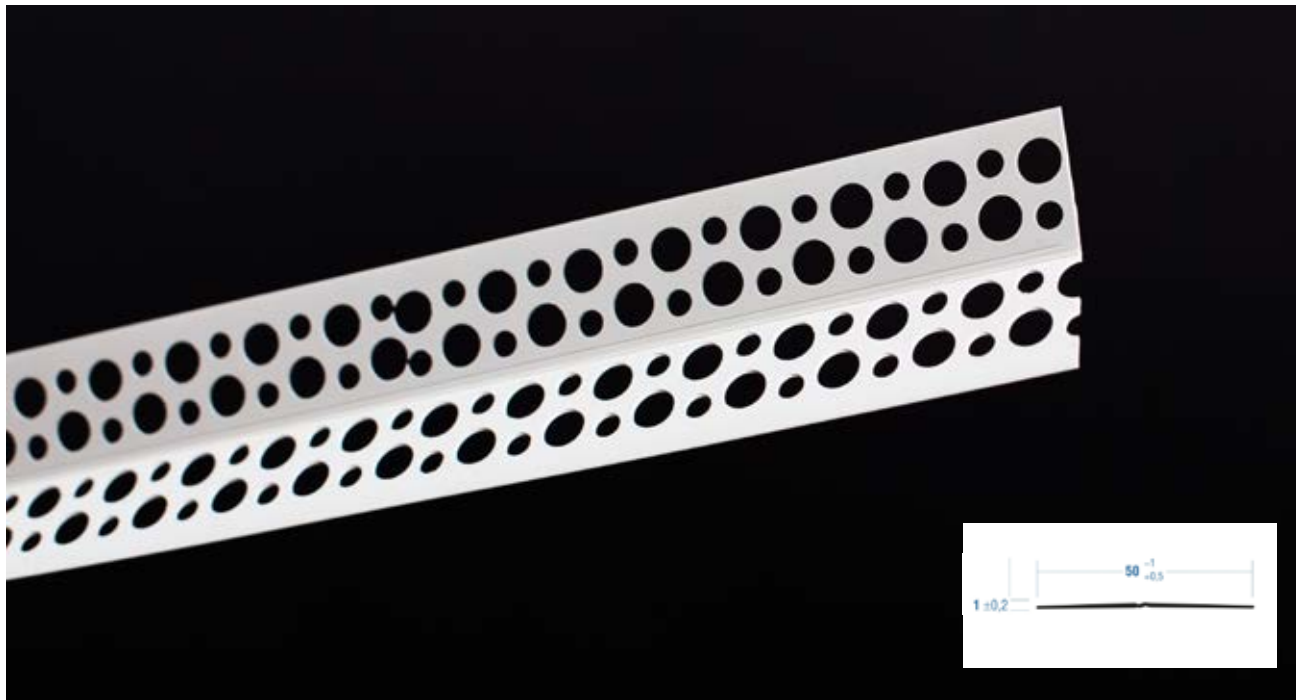

Used to create wall corners; allows efficient working of the edges.

## PVC arched corner bead PT3

Length: **2.5 m and 3 m**  
Packaging: **50 pieces (125 m, 150 m)**

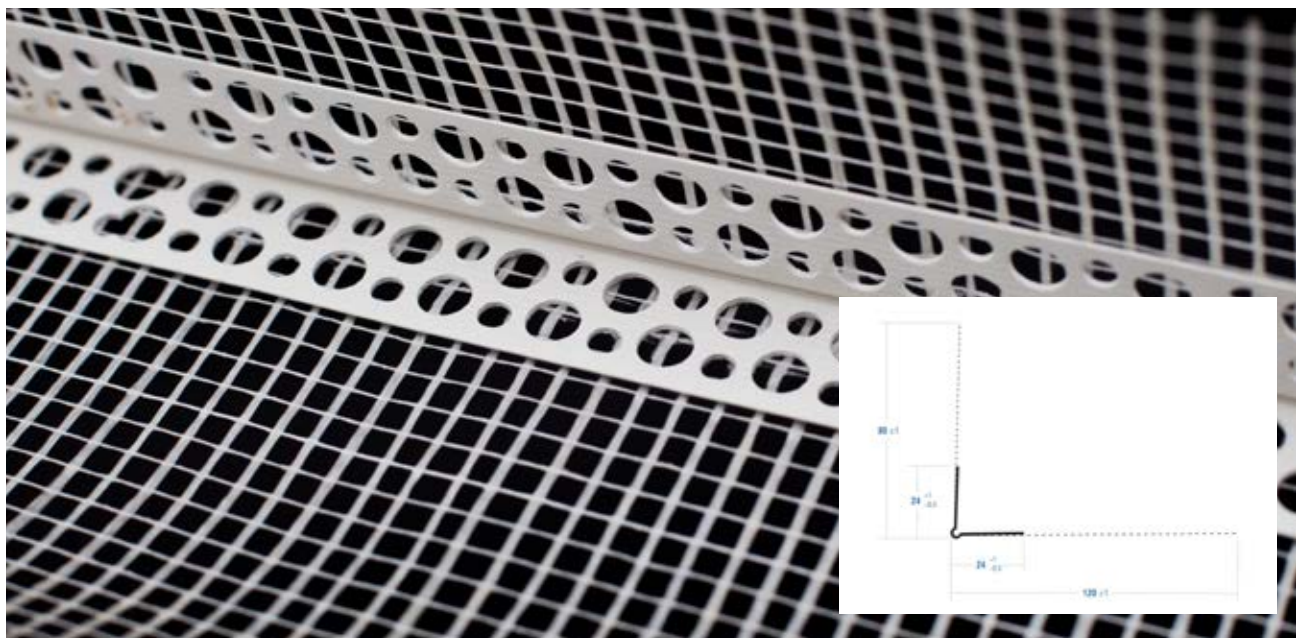

Used to create arched corners; allows efficient working of the edges.

## PVC universal corner bead PT4

Length: **2.5 m and 3 m**  
 Packaging: **50 pieces (125 m, 150 m)**

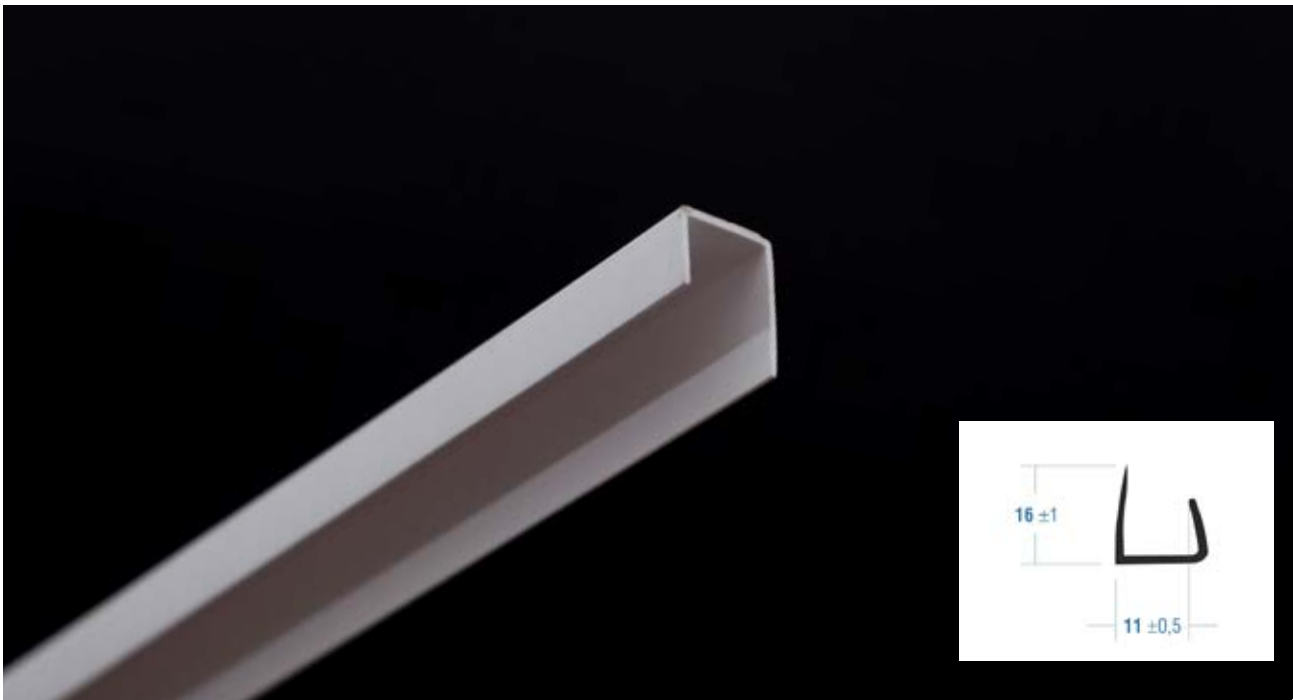

Used to cover unequal angles in attics. Also available in 25 m rolls.

## PVC corner bead with mesh PT10 – 10 cm x 10 cm mesh PT9 – 7 cm x 7 cm mesh

Length: **2.5 m and 3 m**  
 Packaging: **100 pieces (250 m, 300 m)**

Used as reinforcement for wall corners; allows efficient working of PS foam board edges in thermal insulation systems in buildings.

## PVC J-PROFILE PT5

Length: **2.5 m and 3 m**  
 Packaging: **50 pieces (125 m, 150 m)**

PT5 profiles are installed at the interface between plasterboards and wall casing. They conceal irregular edges of the plasterboard

## PVC J-profile with seal and mounting tape PT7

Length: **2.5 m and 3 m**  
 Packaging: **40 pieces (100 m, 120 m)**

PT7 profiles are installed at the interface between plasterboards and wall casing. They conceal irregular edges of the plasterboard

## Closing strip for dimpled membrane PROFILE P6

Length: **2 m**  
 Packaging: **25 pieces (50 m)**  
 Colour: **black**

Prevents earth from getting between the membrane and the foundation, contributing to better microventilation of the foundation.

## Bolt for dimpled membrane PT21 (black), PT22 (white)

Dimensions: **27 mm x 56 mm**  
 Packaging: **100 pieces + torx40 bit for installation**  
 Colour: **black, white**  
 Material: **polypropylene**

Intended for installation of dimpled membrane.

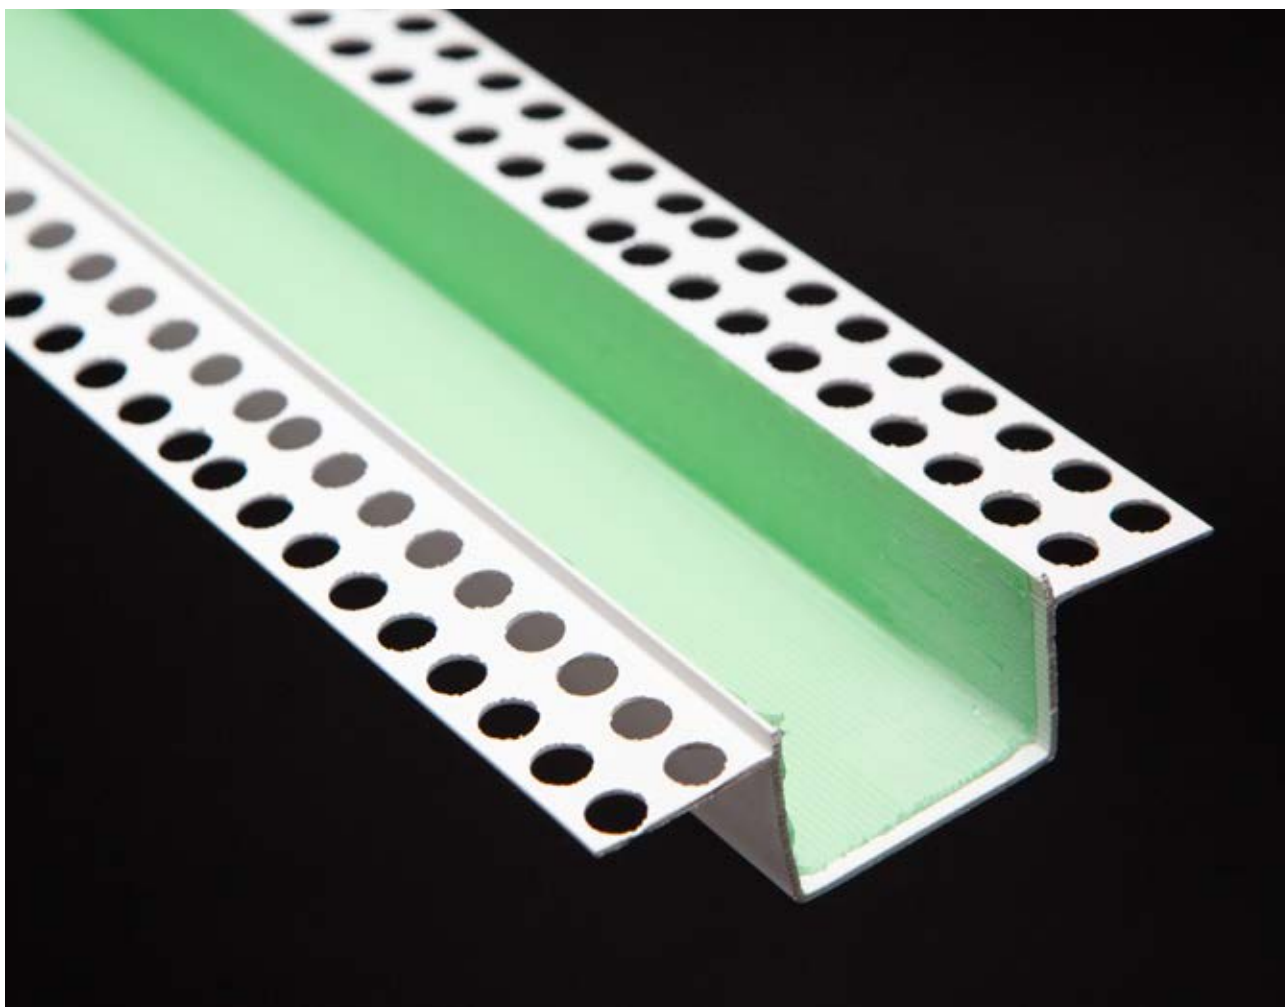

## Nail with washer for dimpled membrane, PT26

Dimensions: **Ø 3.5 mm x 45 mm**  
 Packaging: **100 pieces**  
 Material: **galvanised, hardened steel**

Intended for installation of dimpled membrane.

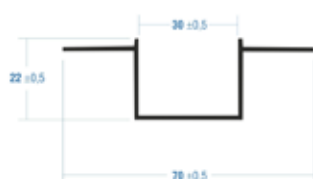

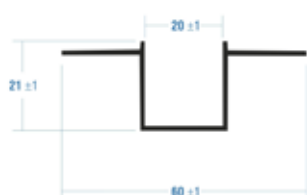

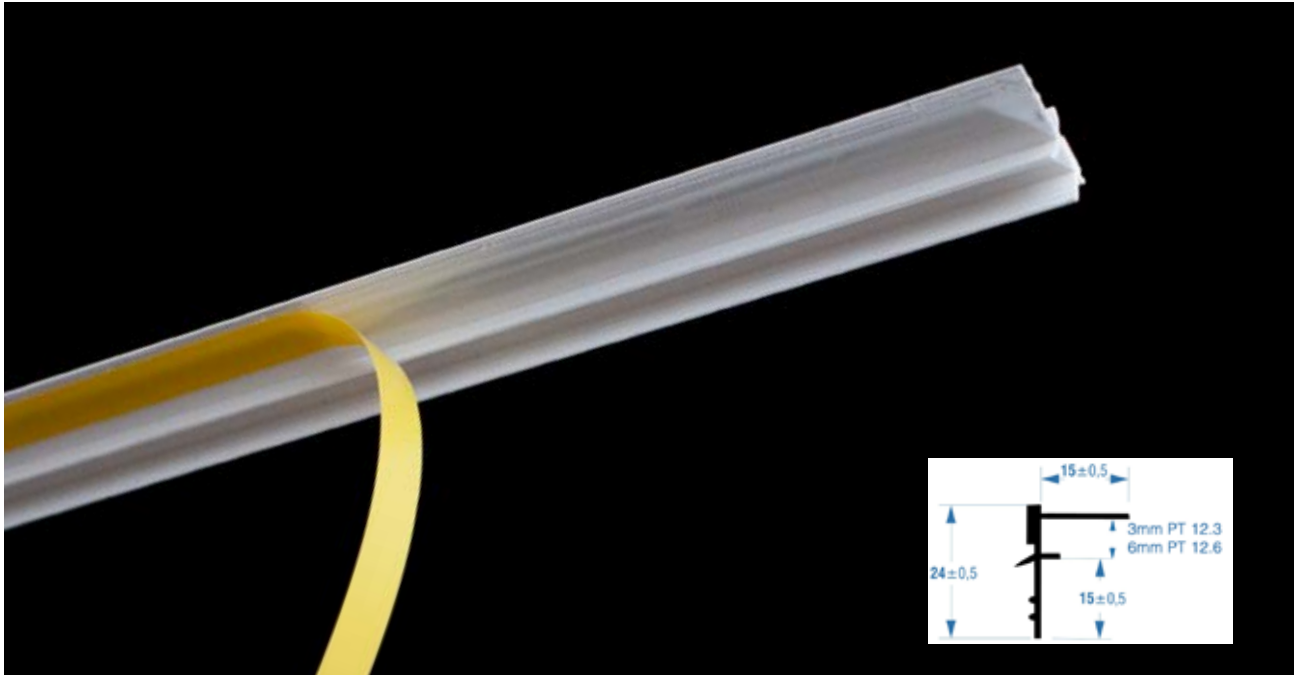

Rustication profile with  
protective film  
PT 11.2, PT 11.3, PT 11.5

PT11.2 (H2) 35 pcs (105 m), PT11.3 (H3) 30 pcs (90 m),  
PT11.5 (H5) 20 pcs (60 m)

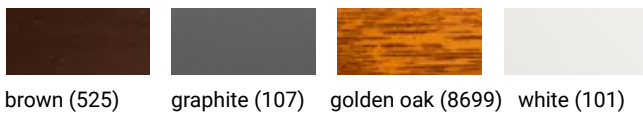

Improves visual appearance of the façade, enhances its  
aesthetic value and creates divisions that make even unexciting  
façades interesting.

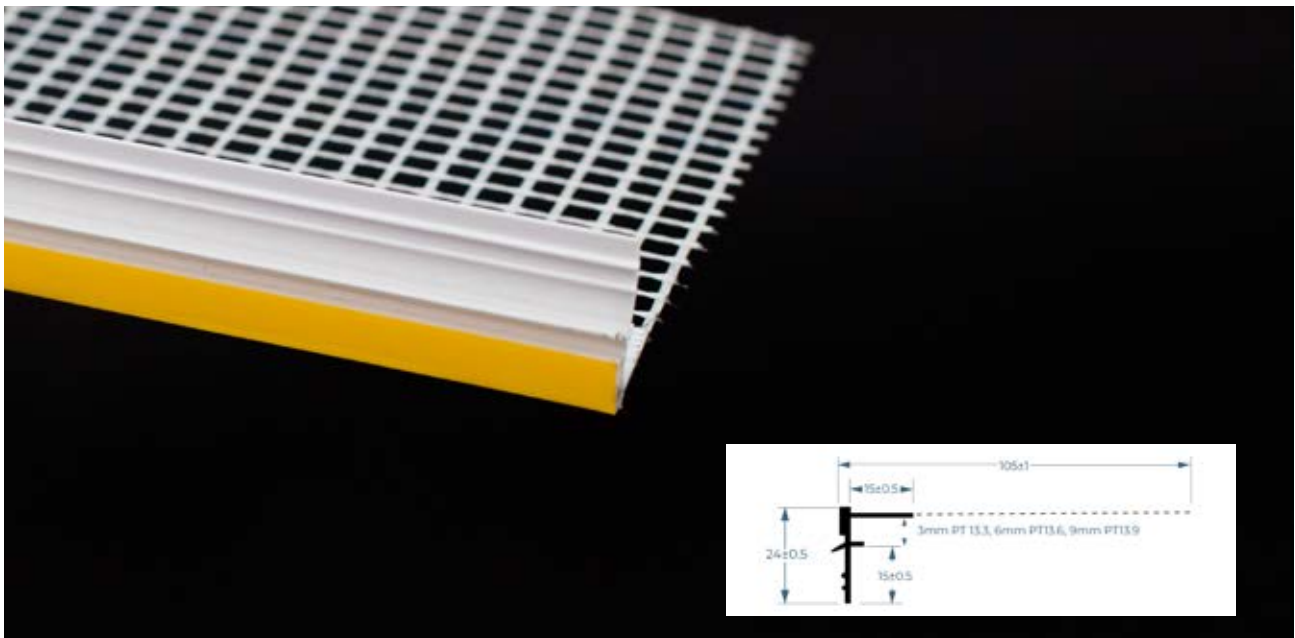

## Window connecting profile PT12.3, PT 12.6

Length: **2.5 and 3 m**  
 Packaging: **50 pieces (125 m, 150 m)**  
 Colours: **brown, graphite, golden oak, white**

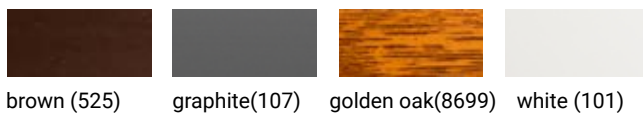

This profile is used to create an expansion gap between window casing and plaster indoors.

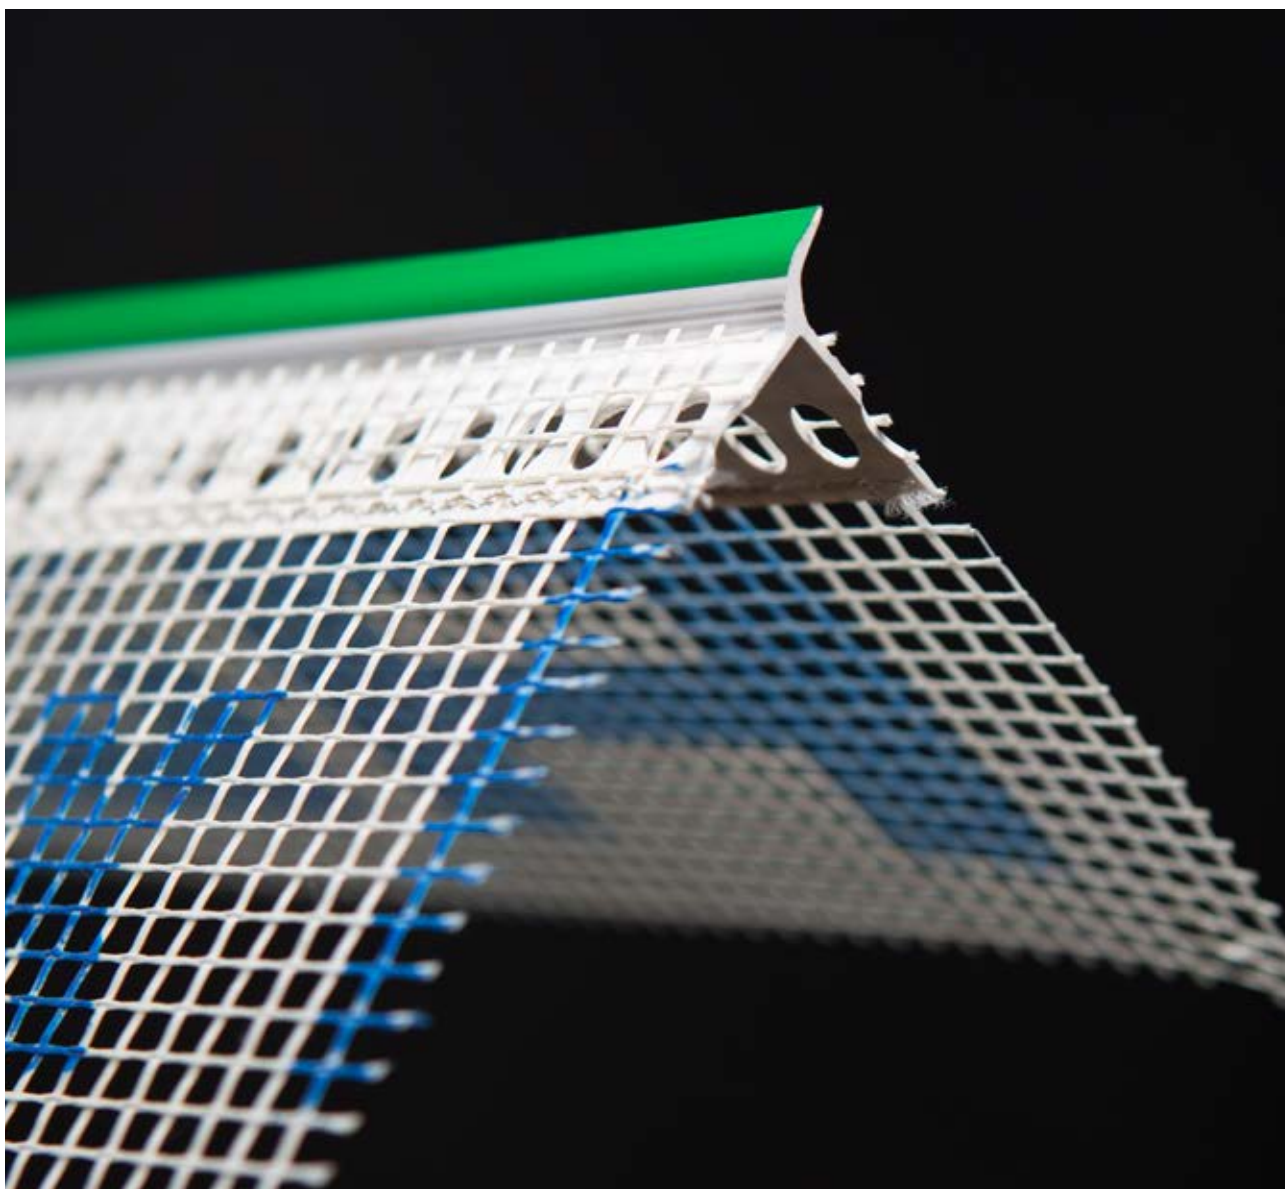

## Expansion gap profile PT 13.3, PT 13.6

Length: **2.5 and 3 m**  
 Packaging: **25 pieces (62.5 m, 75 m)**  
 Colours: **brown, graphite, golden oak, white**

This expansion gap (sealing) profile for window casings is used to create an expansion gap between the window casing and plaster outdoors.

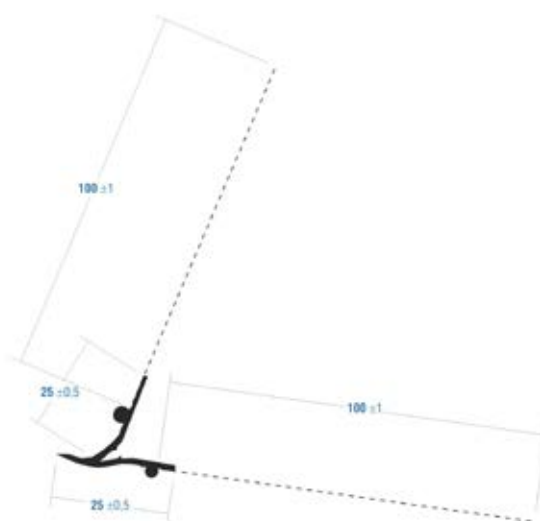

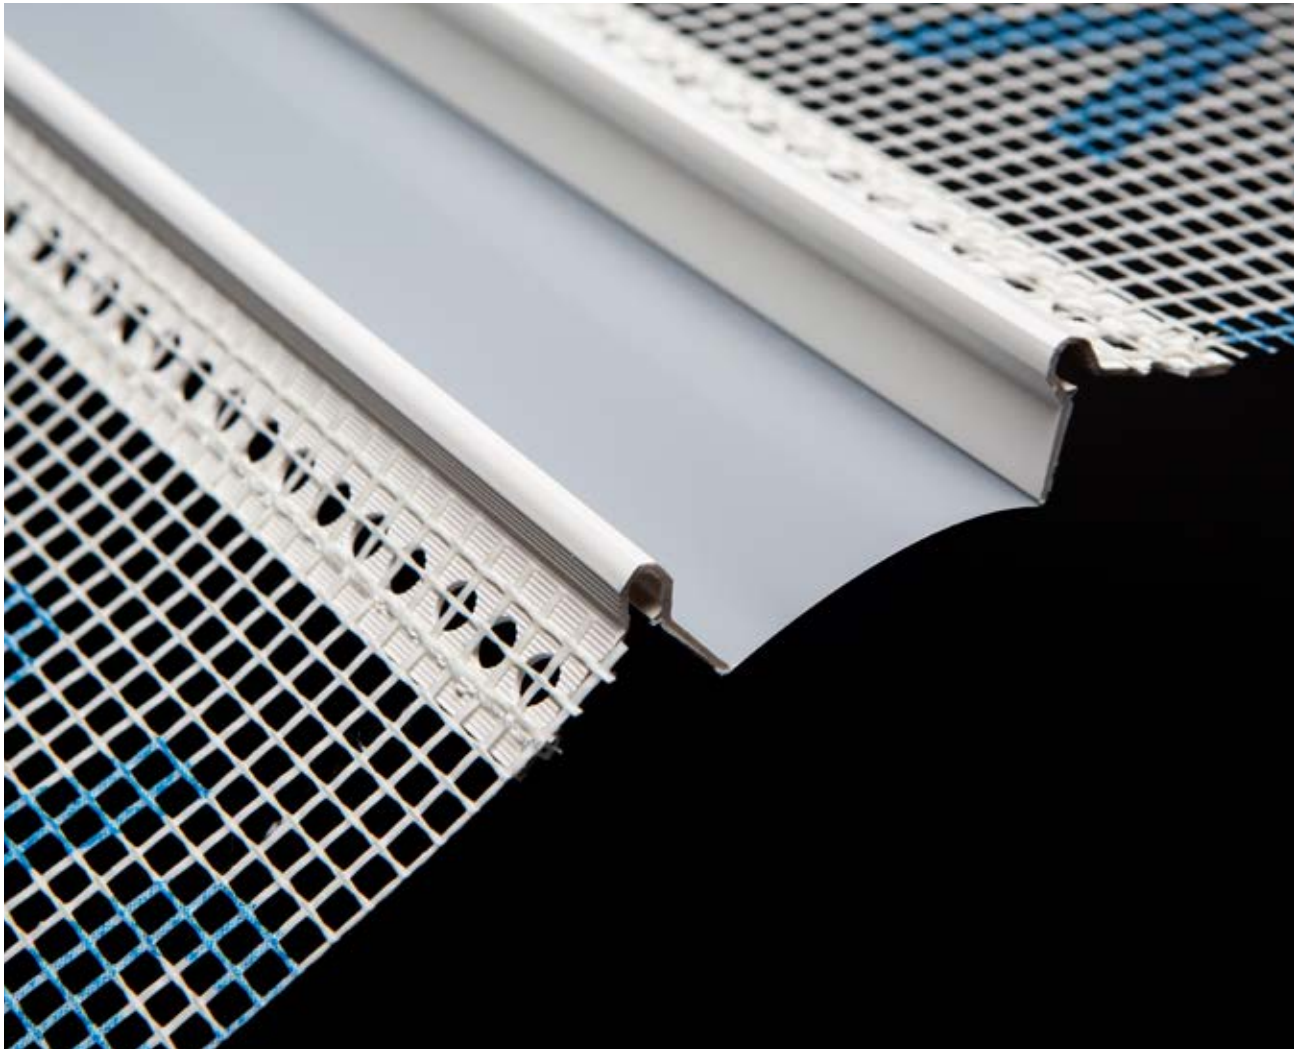

## PVC drip bead with mesh and protective film P14

Length: **2.5 and 3 m**

Packaging: **25 pieces (62.5 m, 75 m)**

Used to finish horizontal façade edges. Prevents plaster from soaking.

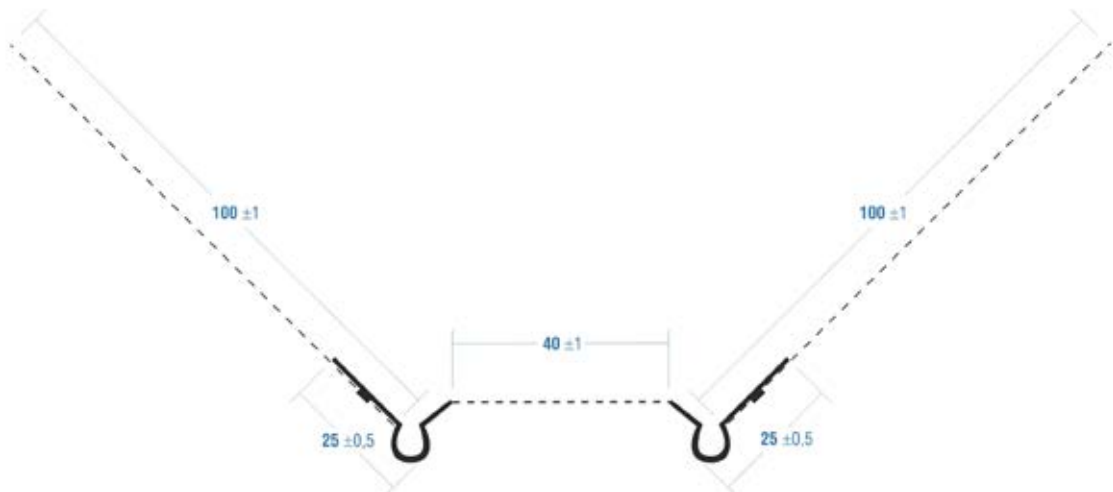

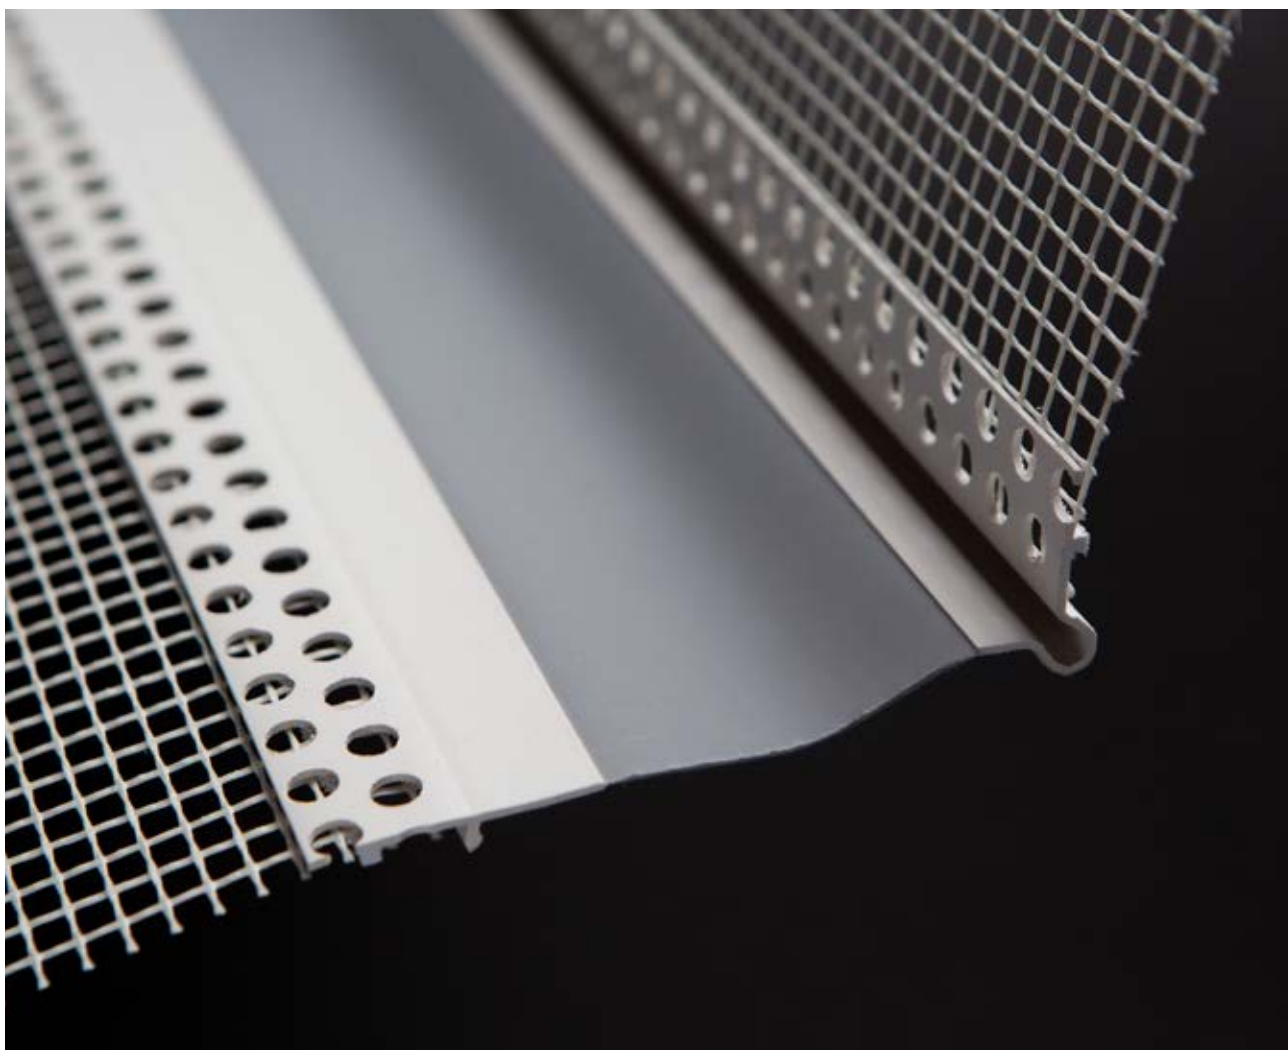

Movement bead with mesh  
PT15 straight

Length: 2 m  
Packaging: 25 pieces (50 m)

Straight movement bead with mesh.

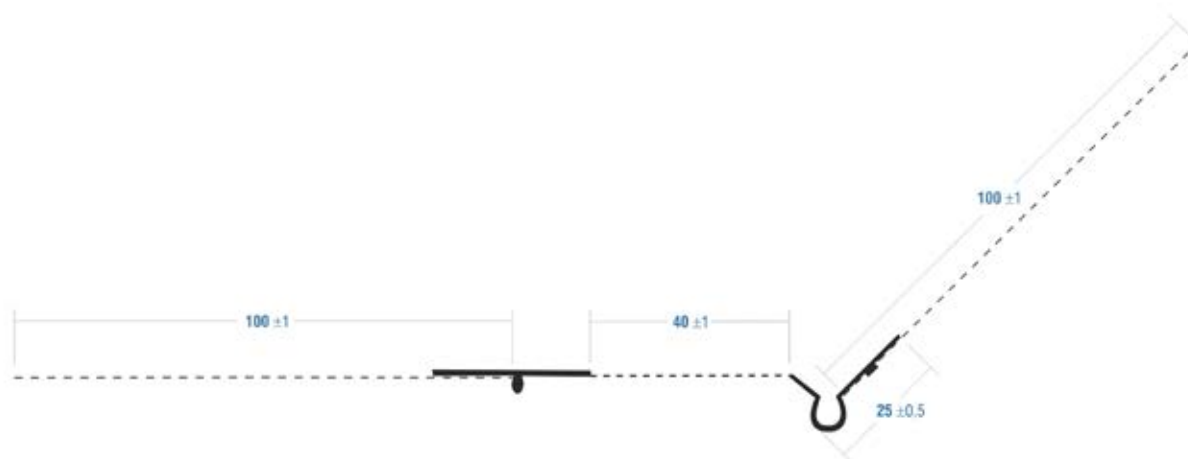

**Movement bead with mesh  
PT16 angled**

Length: **2 m**  
Packaging: **25 pieces (50 m)**

Angled movement bead with mesh.
